

SMEG MINI KETTLE: A STYLISH LITTLE BREAK

With its graceful and colourful appearance, the **Smeg KLF05 mini kettle** from the 50 Style line is an iconic object with an unmistakable design by Raffaella Mangiarotti and Matteo Bazzicalupo (**Deepdesign**). Thanks to its compact size, it is perfect to decorate any environment, even those with limited spaces.

The **pop soul** of the KLF05 kettle is reflected in the **variety of colours** available: pastel colours such as cream, green, pink and blue and bold shades such as red, black and white enhance the chrome base and the stainless steel details of the spout and the on-off controls.

With **1400 watts power** and a **capacity of 0.8 litres**, the Smeg mini kettle minimizes any waste of water and moderates energy consumption: suitable for the home office, the living room and to give a cool look to hotel rooms. In addition, the **double wall** with internal stainless steel maintains water temperature and makes the external surface colder to touch.

Smeg does not give up on comfort: the practical base with 360 degree connection makes it easier to use and the non-slip feet guarantee a stable support. In addition, the manual opening with an angle of 80 degrees is designed to easily fill the carafe.

Quick and reliable, the Smeg KLF05 mini kettle guarantees safe use: it switches off automatically when it reaches boiling point, as well as in the case of insufficient water or the body detached from the base.

A true **design icon**, the newcomer to the Smeg home is ideal to characterize any environment with an unmistakable style, to always be kept in view alone or combined with other 50-style aesthetic products.
