

# Ceramic Containers

Alexander Girard, 1952

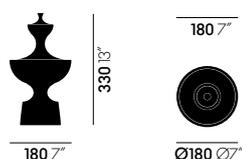

The three original models of the Ceramic Containers were made of wood, hand-turned by Girard on the lathe. Their silhouettes are reminiscent of the traditional shapes of apothecary vessels, board game tokens or millinery blocks. These original wooden objects are held in the Girard Archive at the Vitra Design Museum. Using these models as templates, Vitra has joined

together with the Girard family to develop the Ceramic Containers in cast ceramic. The natural material lends the Ceramic Containers an artisanal flair.

• **Material:** ceramic, hand-glazed.

## DIMENSIONS

Ceramic Container - No.1

Ceramic Container - No.2

Ceramic Container - No.3

## COLOURS AND MATERIALS

cream

ice grey

dark aubergine
