

May Bench

The May bench reflects the lines and dimensions of the largest table in the series. A light steel sheet wraps neatly around a sturdy steel frame to form the seat, with a slit for water drainage repeated as a unifying design detail throughout the collection. On its own, the bench invites quiet moments during garden strolls, while paired with the May table, it creates a cosy setting for casual al fresco dining, where everyone can gather and squeeze together if the guest list unexpectedly grows.

Product highlights

- Part of a family ensemble consisting of the May Chair, Armchair, Bench and Tables.
- Available in two colors.
- Features an outdoor powder coating.
- Suitable for use in both public and private settings
- Made from steel for heavy, qualitative feel.

Product Type Bench, Outdoor Furniture

Designer Hannes & Fritz, 2024

About the Designer

Hannes & Fritz is the design studio of Johannes Breuer & Fritz Gräber. With Johannes in Stuttgart and Fritz in Zurich, they develop each project through a mix of individual and mutual work across cities. Both have a very similar skillset and common interests, but they each bring their own unique perspective to their collaborative projects; Johannes' tendency to be rather linear and emblematic, and Fritz's more dynamic and expressive design language. Merged together, the results are more interesting than what each designer could have achieved individually.

Environment Outdoor

Country of Origin Croatia

Assembly Requirements Attach legs to table top.

Material The May Bench is constructed from steel, with a primer and top coat suitable for outdoor use.

Cleaning & Care

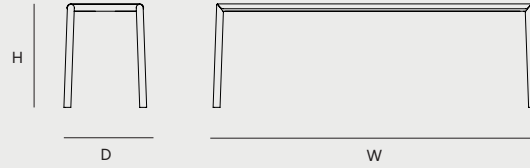

Clean the bench using a soft, dry or slightly damp cloth. If needed, apply a mild detergent and promptly wipe away the soap residue with a clean cloth. Avoid using abrasive cleaning tools or strong cleaning agents as they may cause damage to the surface of the product.

With regular use, minor rust spots may naturally appear. Scratches or damage to the powder-coated surface can make the exposed areas more prone to corrosion. Chipped or peeling paint from impact may further increase this risk. Furthermore, placing the furniture near the sea can accelerate the corrosion process.

Dimensions

Height: 470 mm / 18.5"
Width: 1450 mm / 57.1"
Depth: 350 mm / 13.8"

**Packaging Dimensions**

Height: 40 mm / 1.6"
Width: 1480 mm / 58.3"
Depth: 370 mm / 14.6"

Weight

23.6 kg / 52 lbs

Versions

Master Item No: 43211
Variant: Light Grey

Master Item No: 43210
Variant: Dark Green

Production & Components**Materials, Treatments & Adhesives**

Surface treatments used are not labelled with risk hazardous classifications.

Packaging

Flat packed with paper packaging.
