Bamboo treatment:

The Bamboo armrests on your chair are treated with a special impregnation from the factory. In order to keep the chair nice, it is important to oil the bamboo armrests regularly with oil suitable for bamboo outdoor furniture. A high quality clear teak oil can be used.

In order to prevent algae and fungi, it is important that the bamboo is saturated by oil.

To secure a longer life for your chair, please store inside in winter season.

Ask in the store where the chair was purchased for choosing the right oil.
