INTERCONNECT CANDLE HOLDER, BRONZED BRASS
Designed by *Colin King*

*Introducing the Interconnect Candle Holder
in a new metal finish.*

The Interconnect Candle Holder marks an evolution in candleholder design, seamlessly blending form and function to redefine aesthetic and practical boundaries.

Now introduced in a stunning new metal finish, its exaggerated proportions are shaped in bronzed brass. Crafted with meticulous precision, the candleholder is not merely a functional item; it is a bold sculpture that adds an artistic flair to any space. The design ingeniously combines a sphere, an angle and a line, creating a deceptively simple yet visually intriguing geometric form. This unique combination of elements transforms the candleholder into a striking focal point, whether illuminated or at rest.

The bronzed brass finish not only adds a touch of opulence but also enhances the overall elegance of the piece, aligning seamlessly with modern design sensibilities. When candles are lit, the Interconnect Candle Holder transforms into an artful illumination source, casting unique shadows and creating a captivating play of light that adds to its allure.

The Interconnect Candle Holder in Bronzed Brass launches online and at Audo Copenhagen retailers on 28. February 2024.

About the Designer

Professionally trained as a dancer, Colin King found himself at the intersection between a dancer's awareness of space and a stylist's impulse to bring it to life before foraying into the realm of product design. Currently based in Tribeca, New York City, he finds himself in a balance between being on set, styling and designing from his studio. Colin has styled for major publications such as Architectural Digest and T Magazine and hosts a myriad clientele within the genres of product and interior design.
