

STACKED

designed by

JDS JULIEN DE SMEDT ARCHITECTS

"How to be specific and generic altogether? Shelving systems have a tendency to achieve one concern but never both. We decided to dimension shelving units based on the generic measurements of things to store and display while allowing for them to be combined according to specific needs and desires... the result can be at times a random stack of boxes or a coordinated grid of efficient storage... or both!"

MATERIAL: Painted MDF, 18 mm thick
COLOUR: White
