

APOLLO 180 FLOOR —
BY BROBERG & RIDDERSTRÅLE 2020

#792414 #792415

With a composition that alludes to mass and weight, Apollo is a lamp made from a solid piece of machine-turned brass or aluminium.

ABOUT

With a composition that alludes to mass and weight, Apollo is a lamp made from a solid piece of machine-turned brass or aluminium. Its conical shapes balance end-on-end like spinning gyros, emphasising a dynamic, downward, thrusting force. A lamp with a real heightened material presence, with its surfaces left deliberately raw. The Apollo family comes in a range of colours that can be used singularly or hanging in various heights as a group constellation. A new addition to the family is the distinctive Apollo 180 floor lamp, in lacquered or black anodised aluminium. The upward turning conical shapes give an indirect light.

SPECIFICATIONS

designer	BROBERG & RIDDERSTRÅLE
category	FLOOR
dimensions (cm)	D:25 H:180
cable (cm)	250
max watt	1*7W
bulb included	NO
recommended lightsource	
socket	GU10
class	CLASS II
ip	IP20

ITEM NO 792414

colour	ALUMINIUM
ral	
cable	PVC - BLACK
material	ALUMINIUM

ITEM NO 792415

colour	BLACK MAGIC
ral	
cable	PVC - BLACK
material	ANODIZED ALUMINIUM
