CARE GUIDE — METALS

HOW TO CLEAN / POLISH

BRASS / STAINLESS STEEL

Make sure the metal is clean for dust and dirt on all surfaces before you begin polishing. Then apply an adequate amount of metal polish for brass / stainless steel with a soft and dry cotton cloth to the item. Use a soft & dry cloth to polish the surface before the polish has dried.

(Make sure to read the instructions on the metal polish for specific guidance)

POWDER COATED IRON / STEEL / ALUMINIUM

To get rid of dirt and dust, mix a mild detergent with warm water. Dip a lint free cloth into the water & wipe the item down with the cloth. If necessary, wipe the item dry with a soft dry cloth.

(Avoid scraping or rubbing the powder coating with an abrasive cloth that could damage or remove the coating from the surface)
