

# EBB & FLOW

## Thank you for purchasing an EBB & FLOW product

The glass lamp shades are handcrafted using mouth-blown glass. Air bubbles and thickness may vary, and other imperfections may occur. These are not considered defects, but unique characteristics of the handmade product.

### Care and cleaning instructions

**The metal lamp parts** of the lamp do not change appearance over time, if this recommendation is followed: Wipe off dust with a dry, soft cloth. Remove greasy spots etc. with a soft cloth dampened in lukewarm water (<50 C) with a mild detergent. Do not use thick polish products or glass/ window cleaning products.

**Mouth-blown glass** must be cleaned in cold condition. Do not use detergent containing abrasives and solvents, since it will damage your lamp. Do not rub when cleaning the glass shades. Do not use glass window cleaner or the like. Never soak the lamp or parts from the lamp in water or other liquids.

Remember to dry off immediately with a clean soft cloth to avoid marks from water. All water must be evaporated before the lamp is lit again. Does your lamp contain metallic paint, please note that also those parts must be cleaned as described above.

**Fabric lamp shades** should be cleaned by wiping off dust frequently with a dry, soft cloth. Do not soak rub when cleaning nor soak the lamp shades in water or other liquids.

### Mounting instructions

This lamp must be fitted and installed by a qualified electrician to avoid hazard. In some countries, electrical installation work may only be carried out by an authorised electrical contractor. Contact your local electricity authority for advice.

If the external flexible cord is damaged, it shall be exclusively replaced by the manufacturer. The main voltage written in the technical information shall not be exceeded.

For any questions to your EBB & FLOW product please contact your local dealer or at [info@ebbandflow.dk](mailto:info@ebbandflow.dk).
